

Fully Funded PhD Student Positions in the Faculty of Information at the University of Toronto

The Faculty of Information at the University of Toronto offers fully funded PhD student positions to study with Prof. Christoph Becker in the areas of Human Computer Interaction, IT for sustainability, civic tech, CSCW, Computing within Limits, ethical and responsible tech, sustainable software engineering, and related areas. We are looking for outstanding students from all over the world to join our diverse network of passionate scholars in Toronto. The Faculty of Information has a unique, vibrant PhD program that studies the intersection of information, technology, people, and communities.

Prof. Becker and the Just Sustainability Design Lab conduct transdisciplinary research to help meet the urgent need for sustainability and social justice at a time of ecological, political, and societal crises. We do this through critical examinations of the values, politics, and cognitive processes of technology design and the development of methods and tools for **just sustainability design** in computing and IT. Collaborative design projects provide the empirical context to translate knowledge to practice. We publish at top venues in computing and information including CSCW, Limits, COMPASS, PDC, and ICSE, funded by grants from NSERC, CFI, ORF, and others.

What the Faculty of Information Offers:

- Excellent career opportunities in a dynamic international research community
- A structured PhD program with innovative curriculum
- Challenging and cutting-edge research projects
- World-leading university in the heart of a vibrant, diverse city
- Individual supervision and mentoring by globally recognized faculty
- More than 70 distinguished and internationally recognized faculty
- Full funding for international and Canadian students
